ABOUT ME

Project Leader and Software Developer with experience in full stack development using JavaScript, Node.js, React, Vue.js and Laravel. I work defining technical project scope, supporting developers during implementation, reviewing code when needed and validating system architecture. Strong focus on software engineering, scalable systems, DevOps practices (Docker, CI/CD, AWS) and security in production environments.

EXPERIENCE

Wiplay   **São Paulo, Brazil**
Project Leader   **November/2024 – Present**
- Defined technical scope, requirements and project planning.
- Worked closely with 3 developers, supporting development and delivery.
- Provided technical support, reviewed code when necessary and validated architecture decisions.
- Participated in Blue Team activities, helping to fix more than 30 critical security issues found in internal audits.
- Worked on production systems used by more than 50,000 monthly active users.

Wiplay   **São Paulo, Brazil**
Full Stack Developer   **January/2024 – November/2024**
- Developed web applications using JavaScript, Vue.js and Laravel.
- Built REST APIs and integrations between microservices, keeping 99.8% system availability in production.
- Worked on architecture discussions and followed version control best practices using Git and Bitbucket.

Apptalk   **São Paulo, Brazil**
Full Stack Developer   **August/2022 – October/2023**
- Developed web applications using JavaScript, Vue.js and Laravel for corporate clients.
- Found and fixed critical system issues.
- Created automation tasks and web scraping solutions using Python, Selenium and Pandas.
- Used Git and Bitbucket for version control and continuous delivery.

EDUCATION

Centro Universitário FEI   **São Bernardo do Campo, Brazil**
Computer Science   **Expected Graduation: July/2026**

Santander Academy   **São Paulo, Brazil**
Cybersecurity Bootcamp   **Certification Issued: January/2025**

SKILLS

Languages and Frameworks: JavaScript, TypeScript, Node.js, React, Vue.js, PHP, Laravel, Python

Architecture and DevOps: Docker, AWS, Azure, Linux, CI/CD, Microservices, REST APIs

Databases: PostgreSQL, MySQL, MariaDB, MongoDB

Security and Monitoring: Burp Suite, System Hardening, Wireshark, Splunk, Log Monitoring
